

HYPEBOX[®] V2 LINE-UP

doricαn
trade

43"

The HYPEBOX® V2 is the ultimate interactive transparent LCD showcase. The content displayed on screen invites visitors to playfully interact and discover real objects inside the box. Thanks to the state-of-the-art full glass touch sensor, its design is smooth and modern. The new front opening enables access to the content of the box with ease and flexibility. This new feature was conceived for wall mounted installations, as well as free standing units. The HYPEBOX® V2 is the ideal tool to provide an astonishing moment to its visitors and an overall premium experience.

49"

The HYPEBOX® V2 STELE shares all the newest features that the HYPEBOX® V2 possesses. Available in size 49" and portrait orientation, the HYPEBOX® V2 Stele is aimed to showcase a larger object, as well as a collection of objects displayed on its modular shelves. The support base provides an elegant presentation to highlight the objects displayed in the box. In all V2 models, self-standing Stele or wall-mounted, the internal LED lights can be adjusted according to your preferences or the light conditions of the surroundings.
